EXPERIENCE

ADP, Inc, Costa Mesa, CA – UI Developer

FEB 2021 - PRESENT

- Develop and maintain web applications with React, Redux, HTML and CSS/Sass.
- Implement engineering practices like unit tests, continuous builds and automated deployment.
- Analyze, architect and design new requirements.
- Fine-tune user experience (UX) and resolve technical issues based on user behavior data.

Restaurant 365, LLC, Irvine, CA — *Front-End Software Engineer*

NOV 2019 - MAR 2020

- Develop new components using React, TypeScript and Material UI.
- Customize component styles in React, using CSS-in-JS.
- Rapid prototyping of features for stakeholders.
- Debug and maintain existing React components.

Workday, Inc., Pleasanton, CA — *Software App Engineer*

JAN 2015 - NOV 2019

- Designed and developed new version of Community website using LAMP stack on top of Drupal, Twig templating engine, JavaScript, jQuery, Node, Sass, HTML, and PHP, and using tools like Grunt, Gulp, Composer, Git, and others.
- Implemented and integrated PatternLab custom component library, and concepts of atomic design, to facilitate component reuse and mobile responsiveness.
- Implemented Zurb's Foundation framework for emails.
- Create and maintain Grunt Front-End development tasks.
- Create new UI features and maintain existing ones.
- Work with the UX team on Front-End solutions.
- Simultaneously play scrum master role, leading my team through our Agile process.

- Implemented Behat BDD, PHP behavior-driven development framework, with Selenium and Drupal.
- Expanded and improved existing test automation suite using Selenium, PHPUnit, SauceLabs and Bamboo.
- Monitored test quality to ensure alignment with test automation standards.
- Worked with development peers to ensure consistency of test development.
- Monitored test results throughout the product release cycle.
- Worked closely with the development team and product management team.
- Logged bugs and/or enhancement requests on JIRA.

JStokes Agency, Walnut Creek, CA — *Senior Web Developer*

SEPT 2014 - JAN 2015

- Responsible for the full spectrum of web development and maintenance requirements.
- Effective use of JavaScript, jQuery, Bootstrap, HTML/5, CSS/3 and PHP.
- Site debugging and SEO optimization.
- Version control application and management (Git, SVN, Beanstalk).
- Server and MySQL database set-up.
- Development and customization of WordPress themes and plugins, and landing pages for numerous clients, for example:
    - **Bay Alarm**: Landing page for Pandora promotion.
    - **Black Bear Diner**: Landing page for a special sweepstakes.
    - **Alameda Landing**: Full WordPress site development. **http://alamedalanding.com**
    - **Navigators Global**: Full WordPress site development. **http://navigatorsglobal.com**

EDUCATION
